

## Cable Cutter for Copper & Aluminium Non-Armoured Cables, Cuts Cables up to 250mm<sup>2</sup>

HTP-CC250-PC

### Features & Benefits

- Long service life.
- Extra-long forged aluminium handles reduce operator effort required but maintain lightweight.
- Non-Slip Grips and Ergonomic Handle Design
- Durable
- Sharp and Precise
- RoHS and REACH compliant
- Precision Cuts
- Designed to easily cut mid-size copper and aluminium cables

### Applications

- Reduce potential cable fraying
- Electrical working and wiring
- State Grid construction and underground cable construction
- Building construction
- Ideal for working on Automotive Cable

### Product Information

#### Cable Cutter for Copper & Aluminium Non-Armoured Cables

Our Cable Cutter is designed for clean, sharp cuts, reducing the potential for cable fraying, mainly used for electrical working, State Grid construction, underground cable construction, building construction & Ideal for working on Automotive Cable.

This cutter measures 600mm in length, the vinyl handles are non-slip and forged cutting blades that will give you reliable cuts for many years to come, even under heavy use, the cutter's high-strength alloy handles ensure operator effort is reduced.

Features a safety lock mechanism, ensuring safe storage and preventing accidental injury. The Cutter is also finished with a protective coating to resist rust and wear. Making it a versatile addition to any toolkit with comfortably padded handles, this tool offers a non-slip grip, minimizing hand fatigue during prolonged use.

### Specifications

- Length 600mm.
- Weight 1.54kgs.
- Halogen free
- REACH compliant
- RoHS compliant
