

IDENTIFICATION & LABELLING *systems*

MAKING THE RIGHT CONNECTIONS

This catalogue illustrates our identification and labelling systems.

For each product family the principal features are indicated, along with typical applications and the necessary guidelines for correct application.

Our sales personnel are at your disposal to provide more detailed information and our design and development engineers are available to study new solutions for particular applications.

All Cembre products comply with Directive 2011/65/EU of the European Parliament and Council dated 8 June 2011 (and subsequent amendment)

On 14th December 1990 Cembre SpA Quality Management

System was certified by Lloyd's Register of Quality Assurance

(LRQA) according to ISO 9002:1987 EN 29002 - 1987 BS 5750: Part 2: 1987 for the manufacture of insulated and uninsulated copper crimping connectors.

Then on 22nd December 1992 Cembre SpA was certified ISO 9001 for the design and manufacture of cable accessories, electrical connectors and associated tools.

The activities of the main premises in Brescia, the Italian regional offices and the subsidiary companies in Great Britain, France, Spain, Germany and USA are governed by a single Quality System, assessed by Lloyd's Register of Quality as conforming to the ISO 9001:2008 norm, for the design, manufacture and sales of electrical connectors and associated tools, cable accessories, marking systems, tooling and products for railway applications. In house repair, refurbishment and calibration of tooling.

This guarantees a homogeneous and high quality level of the products and services that Cembre offers to its customers.

Cembre S.p.A. has recently recognised the need to align its Environmental Management System with the spirit and

content of UNI EN ISO 14001: 2004 as fundamental to future development.

To this end the company undertook a wide-ranging review of all functions including development and design stages, material selection, usage and manufacturing processes.

The resulting definition of operational procedures in line with these aims and provisions has enabled Cembre S.p.A. to achieve Environmental Certification, further highlighting the companies sensitive and careful approach to environmental protection.

Cembre S.p.A. has recently enhanced its business processes with the certification

by Lloyd's Register of Quality Assurance, of its Management System for the Health and Safety of Workers, in accordance with the standard OHSAS18001:2007 (Occupational Health and Safety Management System).

The project, launched in early 2011, was strategically designed to facilitate the active participation of all employees at every level in the application of systems management, in order to optimise compliance of risk management capability with regard to laws and regulations concerning the health and safety of workers.

All employees have received exhaustive training and are involved, by exercising their individual responsibility and competence, as key players in the identification of residual risk situations and the proposal of corrective solutions.

For Cembre then, this certification is not only the proper recognition of the quality of work performed, but also an incentive to maintain a determined competitive advantage in increasingly difficult and aggressive international markets.

Cembre S.p.A. Group head office, Brescia, Italy

Cembre Ltd, Birmingham, UK

Cembre Ltd is one of the production units in the Cembre group. Since its establishment in December 1986, the company has enjoyed years of continuous growth. Its main office, laboratory and works are located in Curdworth, near Birmingham, while its active sales force serves customers throughout the UK and Ireland.

Cembre Inc. Edison, New Jersey, USA

Operative since March 1999, Cembre Inc. based in Edison, NJ, provides full stock of our products available to customers, technical assistance and repair capabilities with immediate availability of spare-parts. Our head-office in Edison serves the United States, Canada and Mexico.

NOTES		

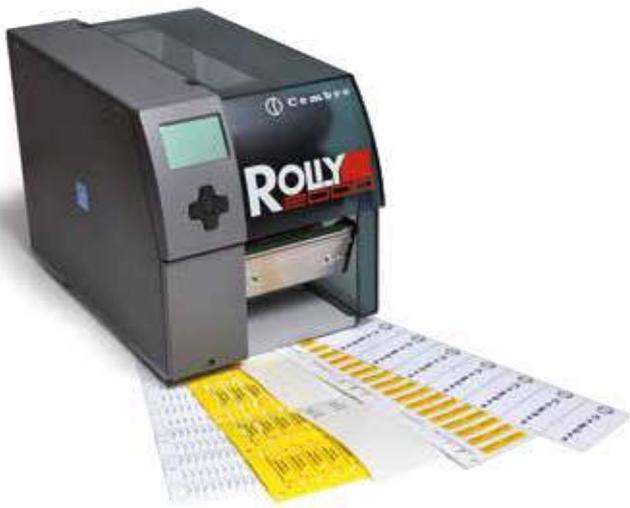

Identification and labelling systems

Cembre offers a number of innovative solutions to meet demands for high performance and reliability in the industrial and manufacturing sectors.

THERMAL TRANSFER SHEET PRINTER MARKINGENIUS®

The revolution in identification systems, MARKINGENIUS®MG3 is a high speed flat bed printer using thermal transfer technology to produce identification and labelling media for cables and tubing, panel building components and equipment of all types. Windows® based, the high resolution MARKINGENIUS®MG3 prints monocolour True Type fonts, while also reproducing Clipart images, drawings and bitmaps down to very small dimensions.

THERMAL TRANSFER ROLL PRINTER ROLLY2000

ROLLY2000 is designed for high speed printing of identification and labelling media in roll format.

Thermal transfer print quality matched with robust construction and intensive Cembre reliability allow ROLLY2000 to print 1000 cable tags in less than two minutes.

ROLLY2000TR1 is more specifically equipped to print TERMO-ROLL heat shrinkable tubing in continuous or ladder format at high speed and with the precision and quality of print required to meet the most stringent standards.

MANUAL SYSTEM

Provides simple solutions for the identification of cables and electrical components with four families of products:

- *push in cable markers- individual characters are collected in order on the insertion tool, then pushed into the transparent holder mounted on the cable.*
- *push on ring markers and flat tie on holder markers used directly on cables, tubing and conduits.*
- *snap on cable markers which can be fitted even after cables are terminated and connected.*
- *wraparound self laminating cable markers available for a wide range of diameters and may be hand printed then attached at any time. Ideal for applications requiring the print to be protected.*

LABELS

Warning, prohibition and mandatory signs, on A4 sheets.

GENIUSPRO

Software

for all Cembre printers

GENIUSPRO is the latest software developed by Cembre.

- Simple and intuitive
- Operator needs only basic computer skills
- Enhanced features include full size Dynamic Preview
- assures increased capability and performance when printing text, symbols and images on Cembre MARKINGENIUS® and ROLLY2000.

MARKINGENIUS® and ROLLY2000 systems are delivered complete with power & connection cables and GENIUSPRO software including a universal driver for Windows® to ensure compatibility.

Software features

Easy data insertion

More than ten types of counter

*.txt, *.cad, *.dbf, *.xls and other file types can be imported

MATRIX, ACS and Simplo conversion

Spac, EPLAN, IGE-XAO and Excel importation

Customisable print output filters

Optimised printing of media for cables, terminal blocks, control gear, connectors, push buttons, components, panels and self adhesive labels

All Windows fonts

Designs customised media

Vector, drawing and clip art printing

Free upgrades with each release

Help function

Minimum system requirements

PC Processor Intel®Core™ i3 or equivalent

Thermal transfer printer for sheet media

on sheet media, plug&play

MARKINGENIUS®MG3 has been exclusively designed by Cembre for the identification of conductors and electrical components.

MARKINGENIUS®MG3 is a high resolution plug&play flat bed printer based on thermal transfer technology, capable of producing tags for cables, pipes and tubes; terminal block markers and legends and labels for all electrical panels, components and equipment. All Cembre MG media can be printed with monocolour Windows True Type fonts at high speed.

MARKINGENIUS®MG3 will also reproduce Clipart images, drawings, barcodes and bitmaps down to very small sizes.

Compact, ergonomic, clean and quiet MARKINGENIUS®MG3 may be conveniently located in an office, like any other computer peripheral.

Each monochrome ribbon can print more than 300.000 MG-TPMF 4x10 mm cable tags with full printable surface coverage. Carriage loading and unloading operations are rapid; support templates are easily interchanged and as the pigment deposited from the ribbon dries instantaneously, printed sheets are immediately ready to use.

Printer dimensions:

- *Length:* 382 mm 15.04 in.
- *Width:* 230 mm 9.05 in.
- *Height:* 221 mm 8.7 in.
- *Weight:* 7,4 kg 21.16 lbs.

MG3

SPEED

prints 112 4x10 cable tags in less than 12 seconds

CONVENIENCE

software provides quick and easy upload of the data to be printed

ECONOMY

prints around 300.000 4x10 cable tags with a single ribbon

Monochrome ribbons

for thermal transfer printer

MG2-ETR monochrome ribbons are formulated to produce high quality print on a variety of materials while providing resistance to abrasion, chemicals, cleaning products and environmental agents (eg UV, humidity). Ribbon length 200m, width 120mm.

MG2-EPTR PREMIUM black ribbon has enhanced performance characteristics, details available on request. A smaller diameter rear tension roller is required for MG2 and MG3 and will be supplied to MG-EPTR users on request. **Use this ribbon to print -HF items.**

RIBBONS

Each sheet of media has 40 tags and takes around 10 seconds to print.

Tags are easily removed from the stems and partially printed sheets may be reused to avoid wastage.

- It is advisable to select the tag based on the actual external diameter of the cable rather than its indicative c.s.a, due to variations in insulation thickness and conductor format.

Material -HF: Polycarbonate, Halogen Free, self extinguishing class V0: UL94.

Operating temperature range: -40°C (-40°F) to +130°C (+266°F)

Support for MG2-TDMO cable tags

Each TDMOS support allows any size of MG2-TDMO tag to be used to mark cables with larger o.d 6 –14 mm typically 16, 35 and 70 mm².

Use directly on cables according to outside diameter.

Material: Polyamide PA6.6, self-extinguishing class V2 (UL94).

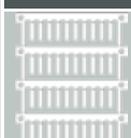

Type	Ø Size mm	Length mm	Quantity
TDMOS-16 42850	6-8	25	150
TDMOS-35 42852	8-10	25	100
TDMOS-70 42854	10-14	25	50

Directly on cables according to the diameter ranges shown in the table.
No transparent holders required.

Wraparound cable markers

self adhesive, precut

MG-KMP wraparound cable markers are suitable for identifying large diameter cables, tubes and conduit.

MARKINGENIUS® printing is exceptionally clear and legible and is protected from chemical and atmospheric agents.

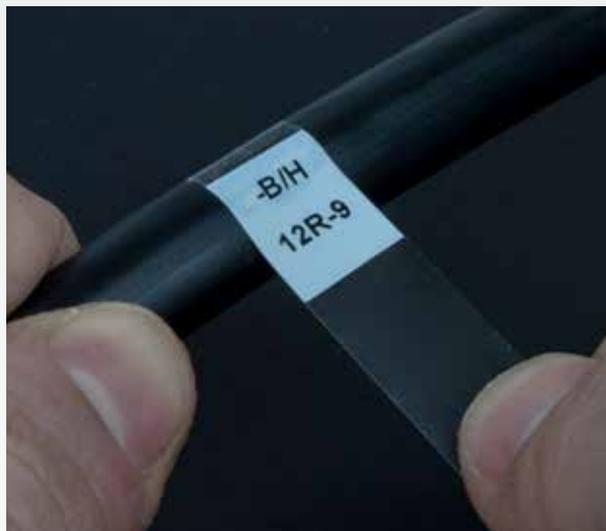

Material: PVC film.

Resistant to water, oil, grease, alcohol, detergent, alkaline substances and atmospheric agents.

Operating temperature range: -30°C (-22°F) to +70°C (+158°F)

Application temperature range: +10°C (+50°F) to +40°C (+104°F)

MG-CPM

TERMINAL BLOCKS

PRINTABLE SHEET FORMAT

MARKINGENIUS®

Terminal block markers

MG-CPM terminal block markers are available in versions to suit the particular clip formats of the most widely used products.

Depending on type, markers are presented as joined strips at a set or flexible pitch or as separate markers for convenient individual insertion on mixed pitch terminal block assemblies.

MG-CPM markers provide an elevated mechanical robustness, high dimensional stability and are Halogen Free.

Printing a complete sheet of MG-CPM markers on MARKINGENIUS® thermal transfer printers takes around 10 seconds, while to optimise application time, additional data - job details, location, etc - may be printed on the stems. Part-used sheets are easily accommodated to avoid wastage.

MG-CPM terminal block markers are available in versions to suit the particular clip formats of the most widely used products.

Material: Polycarbonate, self extinguishing class V0: UL94

Operating temperature range: -40°C (-40°F) to +130°C (+266°F)

MODULAR STRIP

A strip of joined markers is removed from the stem. Without separation, markers are clipped into terminals by light finger pressure. The terminal block is marked quickly and conveniently.

MODULAR FLEXIBLE PITCH STRIP

A strip of joined markers is removed from the stem. Manually extend the strip length by pulling it until the desired pitch is reached. Clip the strip directly into the terminal blocks by light finger pressure.

SINGLE

Without removal from the stem, markers are clipped into terminals by light finger pressure. Bend the stem upwards to detach it from the markers. Carefully remove the stem, leaving the markers in situ.

ultradestructible and antitamper film, precut

MG-SAT-V “Void” anti tamper film: when removed, leaves the word “Void” on the surface, as evidence of its removal.

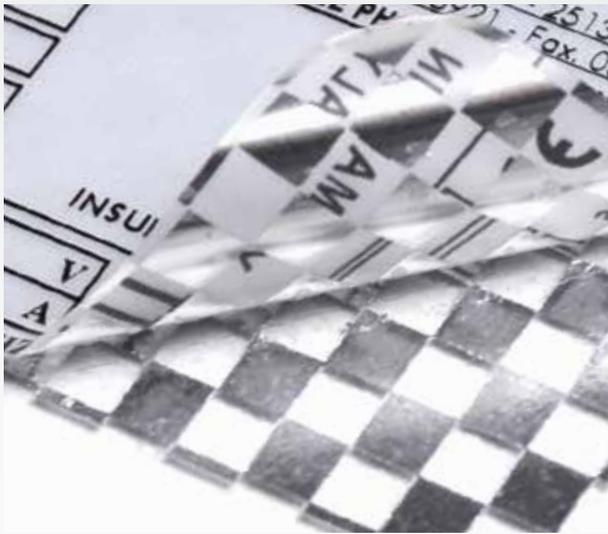

Material: matt Polyester film

Operating temperature range: -40°C (-40°F) to +140°C (+284°F)

MG-SAT-C “Checker-board” anti tamper film: when removed, leaves behind a checker-board imprint on the surface, as evidence of its removal.

Material: matt Polyester film

Operating temperature range: -40°C (-40°F) to +140°C (+284°F)

Size mm			white	metallic grey	Labels per sheet	Quantity	SW code

Customisable panel plates

Print legend & rating plates with full colour logos.

- more time-efficient, cost-effective and adaptable than having plates printed by external suppliers
- matched aesthetic qualities of all printed labels, markers & legends
- provides complete inhouse control of all identification & labelling functions

Free system lifetime support & training is just a call or click away.

ROLLY2000

ROLLY2000

Thermal transfer printer for roll media

Robust and quiet, ROLLY2000 provides reliable, intensive operation in office or factory combined with the facility to optimise printer set-up according to the media.

ROLLY2000 is delivered complete with power & connection cables and GENIUSPRO software including a universal driver for Windows® (7, 8 & 10) to ensure program compatibility.

ROLLY2000 is ideal for printing all Cembre flat material on rolls, eg. cable tags for holders, tie on, wraparound cable markers, legend strips and labels.

Maximum print area: 105 mm wide, up to 2.000 mm long.

SPEED

prints 1.000 4x10 cable tags in less than two minutes

CONVENIENCE

software provides quick and easy upload of the data to be printed

ECONOMY

prints around 140.000 4x10 cable tags with a single ribbon

QUALITY

printer resolution 300 dpi

Printer Dimensions:

- Length 446 mm (17.55 in.)
- Width 242 mm (9.52 in.)
- Height 274 mm (10.78 in.)
- Weight 9 kg (19.84 lbs.)

Thermal transfer printer for roll media

for heat shrinkable tubing

Robust and quiet, ROLLY2000TR1 provides reliable, intensive operation in office or factory combined with the facility to optimise printer set-up according to the media.

ROLLY2000TR1 is delivered complete with power & connection cables and GENIUSPRO software including a universal driver for Windows® (7, 8 & 10) to ensure program compatibility.

ROLLY2000TR1 is designed for optimum single side printing of TERMO-ROLL heat shrinkable tubing and particularly suitable for intensive use of this material in ladder format on a roll.

Printer Dimensions:

- Length 446 mm (17.55 in.)

ROLLY2000

Thermal transfer printer for roll media

double head, for heat shrinkable tubing

Robust and quiet, ROLLY2000TR2 provides reliable, intensive operation in office or factory combined with the facility to optimise printer set-up according to the media.

ROLLY2000TR2 is delivered complete with power & connection cables and GENIUSPRO software including a universal driver for Windows® (7, 8 & 10) to ensure program compatibility.

ROLLY2000TR2 is designed to optimise printing simultaneously on both sides of TERMO-ROLL heat shrinkable tubing in ladder format on a roll.

Dedicated to high level applications where dual marking is an essential specification, eg in many rail, marine and aeronautic applications.

Printer Dimensions:

- Length 554 mm (21.8 in.)
- Width 248 mm (9.76 in.)
- Height 395 mm (15.55 in.)
- Weight 21 kg (46.3 lbs.)

Thermal transfer labels

self adhesive, on a roll

Thermal transfer labels are made from materials which are not temperature sensitive and whose surfaces are treated to accept the pigment from the ribbon heated by the print head.

Labels are normally die cut on a roll and arranged horizontally with respect to the printer output, although some are arranged vertically.

When not in use, labels will maintain their good condition if stored in their original packaging and not subject to excessive heat or significant temperature variation. They should be removed from their packaging only at the time of use and not exposed to moisture for long periods.

Continuous material

for thermal transfer printing, on a roll

Continuous material is made from materials which are not temperature sensitive and whose surfaces are treated to accept the pigment from the ribbon heated by the print head.

When not in use, labels will maintain their good condition if stored in their original packaging and not subject to excessive heat or significant temperature variation. They should be removed from their packaging only at the time of use and not exposed to moisture for long periods.

Aluminium mounting plates

round corners, thickness 0,5 mm

Cembre TTL and TTF labels stuck to Aluminium mounting plates are easily fixed to poles, columns, pylons and structures via the slot or holes provided.

When used externally the application of an additional transparent film CPYG, will improve resistance to environmental agents.

TERMO-ROLL H2

ROLLY2000

Heat shrinkable tubing High Grade 2:1

ladder & continuous, shrinkage ratio 2:1

H2 type heat shrinkable tubing is used to provide highly legible and resistant identification of cables, pipes, conduits, etc within a minimum space.

Halogen Free composition provides flame retardancy and low smoke emission characteristics suitable for safety critical applications including closed environments such as tunnels and subways, rail installations, marine and industrial applications.

Material: Irradiated Polyolefin, shrinkage ratio 2:1

Operating temperature range: -30°C (-22°F) to +105°C (+221°F)

Minimum shrinkage temperature: > +90°C (+221°F)

Technical

Resistance to liquids, after the shrinkage

MIL-STD-202G test method 215 2002 (MIL-81531/SAE-AS81531-1998 clause 3.4.3)

EN 50343:2003 Railway applications, signalling and subways - Rolling stock - Rules for installation of cabling

Meets the requirements for fire testing of materials and components for trains in EN 45545-2:2013 N°010.1IS0040/15

TERMO-ROLL H3

ROLLY2000

Heat shrinkable tubing High Grade 3:1

ladder & continuous, shrinkage ratio 3:1

H3 type heat shrinkable tubing is used to provide highly legible and resistant identification of cables, pipes, conduits, etc within a minimum space.

High flexibility, fire resistance and a 3:1 shrinkage ratio to cover a wide range of cable diameters enable suitability for many industrial and technological applications.

Material: Irradiated Polyolefin, shrinkage ratio 3:1

Operating temperature range: -55°C (-131°F) to +135°C (+275°F)

Minimum shrinkage temperature: > +90°C (+194°F)

TERMO-ROLL M2

ROLLY2000

Heat shrinkable tubing Medium Grade 2:1

ladder & continuous, shrinkage ratio 2:1

M2 type heat shrinkable tubing is used to provide highly legible and resistant identification of cables, pipes, conduits, etc within a minimum space.

Halogen Free composition provides flame retardancy and low smoke emission characteristics suitable for many types of application requiring more restrictive safety standards to be met.

Material: Irradiated Polyolefin, shrinkage ratio 2:1

Operating temperature range: -40°C (-104°F) to +125°C (+257°F)

Minimum shrinkage temperature: > +70°C (+158°F)

Technical

Adherence MIL-81531 AS, SAE-AS81531-199, point 4.6.2

Flammability Flame retardant according to UL 224

Meets the requirements for fire testing of materials and components for trains in EN 45545-2:2013 N°010.1IS0040/15

CONTINUOUS, ON BOTH SIDES

SMP

Stainless steel tie-on tags

Stainless Steel tie-on tags for the identification of cables, wirings and ducts in arduous applications such as:

offshore platforms, shipbuilding, mining, underground, petrochemical, floating units for the production, storage and unloading of oil, refineries, railway infrastructure, food industry, solar field and, in general, where high resistance to aggressive environments is essential.

Material: AISI 316L Stainless Steel

Operating temperature range: up to **+800°C (+1472°F)** (continuous)
up to **+850°C (+1562°F)** (short periods)

Size mm	N° text lines	N° characters per line	Max. number of characters		Metal tie max width	Quantity

Manual cable marking system

Provides alternative manual systems for identifying cables, tubes, conduit, components and equipment.

- *PMP push in cable markers*
- *RMS and FMS push on ring cable markers & flat ring markers*
- *SM snap on cable markers*
- *KM wraparound, self laminating cable markers*

PUSH IN CABLE MARKERS WITH HOLDERS

PMP markers are very simple to use: the appropriate characters are collected in order on the insertion tool then pushed into the transparent holder mounted on the cable.

PUSH ON RING CABLE MARKERS & FLAT RING MARKERS

RMS push on ring cable markers available in four range-taking sizes for marking cables with external diameters from 1,3 to 16 mm (0.05 to 0.62 in.)

FMS flat ring markers printed black on yellow, push onto tie on carriers for attachment to large diameter cables, etc.

LABELS

Alphanumeric signs in PVC film.

WRAPAROUND SELF LAMINATING CABLE MARKERS

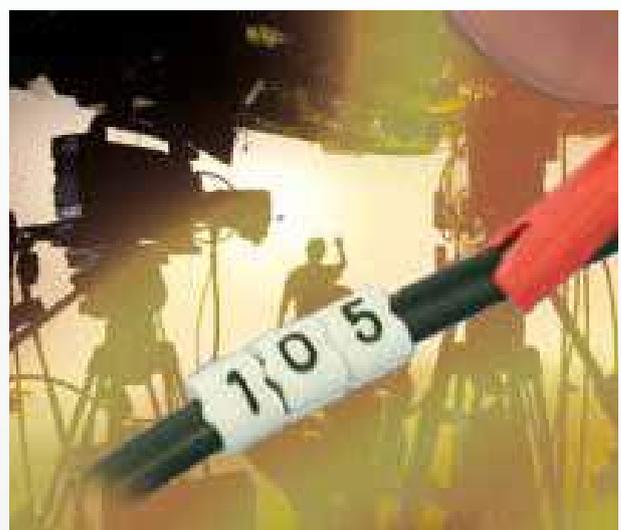

Can be used for identifying not only cables, but also tubes and conduit with diameters up to 38 mm (1.49 in.)

SNAP ON CABLE MARKERS

Minimum overall size snap on cable markers are particularly useful for applications where there is limited space between cables. It is unquestionably the best solution for small cross section conductors and for local network cables and can be fitted even after the conductors are connected.

Indispensable for identifying already completed wiring!

RINGCABLESYS

PMP-30

MANUAL SYSTEM

Push in cable markers

Polyamide, in strips

PMP markers are very simple to use: the appropriate characters are collected in order on the insertion tool then pushed into the transparent holder mounted on the cable.

Once inserted, the characters are protected from degradation by Water, Alcohol, Acids, Alkalis and numerous Solvents.

Characters are available printed in black on white or yellow backgrounds, or colour coded according IEC Standard 757.

PM transparent marker holders can be premounted on cables for later insertion of marking characters without affecting the wiring.

PM transparent holders, in seven range-taking sizes, for identifying cables from 0,10 to 240 mm².

PM-ET self adhesive transparent holders for identifying components and equipment.

MANUAL SYSTEM

Push on ring cable markers

alphanumeric

RMS push on ring cable markers available in four range-taking sizes for marking cables with external diameters from 1,3 to 16 mm.

Characters are printed in black on a white or yellow background, or according to the IEC 757 colour code for numbered or unprinted versions. Made from soft PVC, self extinguishing according to V0 (UL 94), they are chevron cut for perfect alignment on the conductor.

Characters are printed by a hot process, making a slight impression in the material to maintain indelible marking over time.

Material: Soft PVC, self extinguishing according to class V0: UL 94

Operating temperature range: -30°C (-22°F) to +90°C (+194°F)

Cable ext. Ø range 4 ÷ 10 mm

C.s.a range 4 ÷ 16 mm²

plasticised

Laminated write on-tie on

pre-cut, one piece markers, tie on

For attachment by cable ties to pipes, conduits and cables with larger diameters.

A permanent marker is used to handwrite data on the tag over which an adhesive, transparent film is applied for protection.

Material: UV stabilised Polypropylene (PP) for tag.
Polyester (O-PET) for protective film.

Operating temperature range: -10°C (-14°F) to +60°C (+140°F)

Application temperature range: > +10°C (+50°F)

Wraparound cable markers

self adhesive, self laminating, square corners, precut

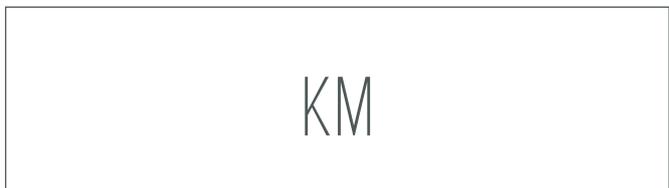

KM wraparound cable markers are suitable for use with marker pens and are ideal for identifying large diameter cables, tubes and conduit. The procedure is quick - carefully hand print on the markable coloured area then wrap the marker around the cable/tube overlapping the clear part onto the marked area to protect it from Water, Alcohol, Dust, and chemical and atmospheric Agents.

The fixing margin is important as it protects the marking from contamination by the hands.

Material: Soft PVC film. Resistant to Water, Oil, Grease, Alcohol, Detergent, Alkaline Substances and Atmospheric Agents. Self extinguishing, high resistance to UV Radiation

Operating temperature range: -30°C (-22°F) to +80°C (+284°F)

Application temperature range: +10°C (+50°F) to +40°C (+104°F)

150	20 ÷ 38	25 x 25	✓	KM15025	189123	184123	30

Directly on cables, etc in accordance with wrapping diameter limitations shown for each size.

ANS

MANUAL SYSTEM

Wraparound cable markers

self adhesive, self laminating, square corners, precut

Adhesive preprinted strips for the temporary or permanent marking of insulated and uninsulated conductors.

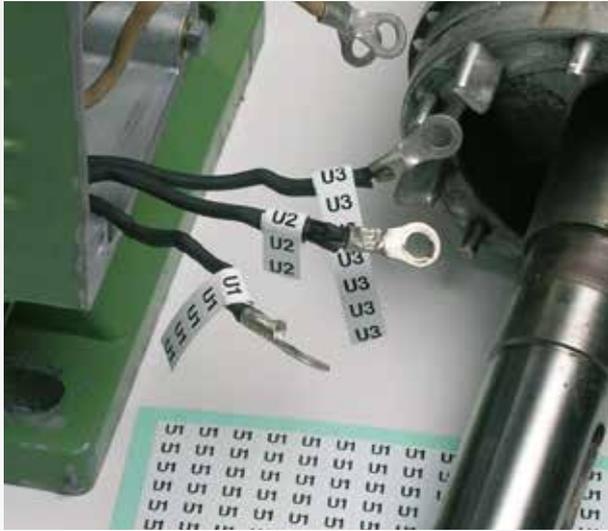

ANS strips may be used in the production of electric motors as the material will withstand the oven temperatures at which the insulating resins of stators and rotors are baked.

Also available with numeric and alphanumeric combinations and progressions.

Material: Polyester film. Resistant to Water, Alcohol, Oils and Atmospheric Agents. Excellent dimensional stability

Operating temperature range: -40°C (-40°F) to +150°C (+302°F)

Application temperature range: +10°C (+50°F) to +40°C (+104°F)

MANUAL SYSTEM

Alphanumeric signs

Pre-printed, in PVC and Aluminium

Also available with numeric and alphanumeric combinations and progressions.

*AR: Aluminium undrilled, not adhesive, made to order

NOTE: Sign with letter "I" is narrower

Material: PVC film

Operating temperature range: -40°C (-40°F) to +80°C (+176°F)

Application temperature range: +10°C (+50°F) to +40°C (+104°F)

Snap on cable markers

alphanumeric

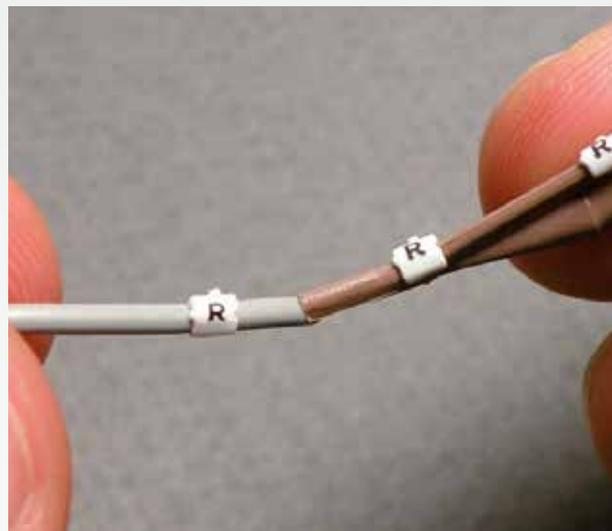

Markers are attached directly from their applicator, which is brown. The small sizes provide an ideal identification system for small-section cables, eg in electronic equipment.

Material: POM – Acetylic Resin dimensionally stable to **+106°C (+222°F)**, nondegradable and nondeformable to **-40°C (-40°F)**, Halogen Free.

Resistant to Oil, Grease, Chemical and Atmospheric Agents, Detergents, Oxalic Acids, Alkaline Solutions and Organic and Inorganic Chemical Substances. High elasticity combined with high rigidity, for optimal grip on the conductor.

Cable ext. Ø range 1 ÷ 1,4 mm (0.04 ÷ 0.05 in.)

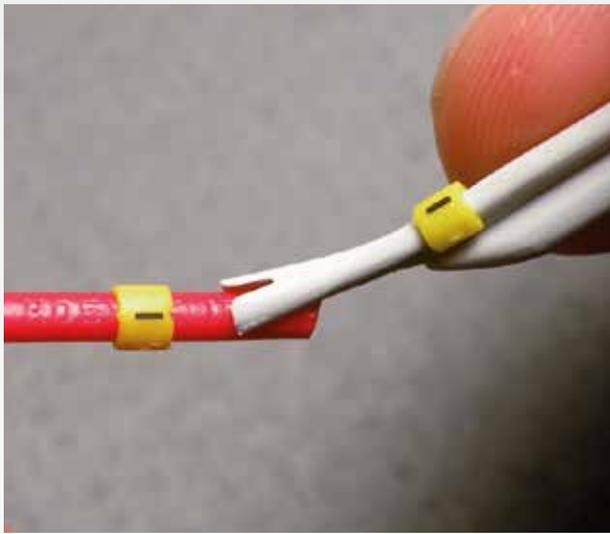

C.s.a range 0,25 ÷ 0,35 mm² (23 ÷ 22 AWG)

MANUAL SYSTEM

Snap on cable markers

alphanumeric

Loose cable markers.

Material: POM – Acetylic Resin dimensionally stable to **+106°C (+222°F)**, nondegradable and nondeformable to **-40°C (-40°F)**, Halogen Free.

Resistant to oil, Grease, Chemical and Atmospheric Agents, Detergents, Oxalic Acids, Alkaline Solutions and Organic and Inorganic Chemical Substances. High elasticity combined with high rigidity, for optimal grip on the conductor.

Cable ext. Ø range 15 ÷ 19 mm (0.59 ÷ 0.74 in.)

C.s.a range 70 ÷ 120 mm² (2/0 ÷ 4/0 AWG)

Marking system accessories

Choose from the following accessories to complete, enhance or protect the printed media.

- *transparent holders for cable tags,*
- *push button legend bases to fit the leading brands,*
- *cable ties,*
- *legend mounting rail,*
- *marker plate and legend strip covers*

TRANSPARENT HOLDERS FOR CABLE TAGS

Holders are pushed directly on to smaller diameter cables, tubing and pipe or fixed with cable ties to larger diameters.

Self adhesive versions may be affixed directly to equipment.

Some types and sizes are available in Halogen Free material.

CABLE TIES

Tie on cable markers, holders and dog tags are firmly fixed, with Cembre G range cable ties, to larger diameter cables & pipes and diverse valves, tappings, etc.

PUSH BUTTON & LEGEND BASES

Designed to fit all major brands, quick-fitting Cembre push button bases with printed legends, both enhance aesthetic qualities and allow transparent covers to be used to increase environmental protection.

MARKER PLATE COVERS

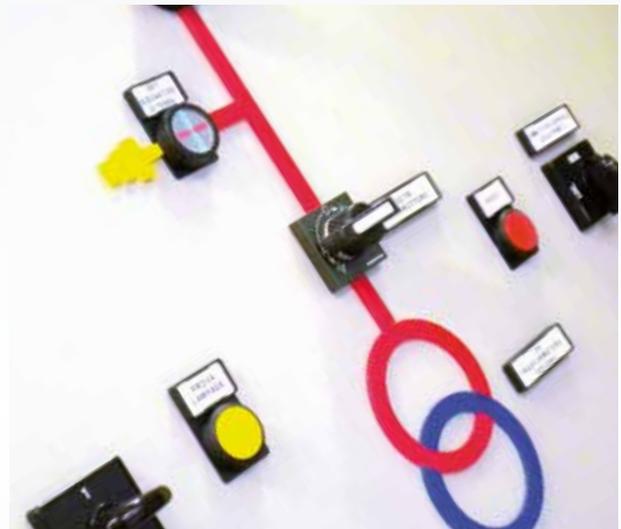

Transparent Polycarbonate covers with pre-drilled fixing holes add extra protection to printed panel plates in aggressive environments.

LEGEND MOUNTING RAIL AND COVERS

9 mm and 15 mm high legends are easily and quickly slotted in to rails for the identification of banks of product.

Rails may be cut and either drilled or stuck to suitable surfaces while optional transparent covers increase environmental protection where appropriate.

ACCESSORIES

Self adhesive transparent flat tag holders

for serie flat cable tags 4 mm

Self adhesive tag holders for surface mounting.

Material: plasticised PVC, self extinguishing to class V0: UL 94, free of Cadmium, Lead, Silicon and Teflon. Resistant to Alkali, Alcohol, Acid and many Solvents.

Operating temperature range: -40°C (-40°F) to +80°C (+176°F)

plasticised

Serie G

ACCESSORIES

Polyamide PA6.6 Cable ties

Ideal for securing tie-on tags, labels and holders to electrical wiring, pipes and conduit. Black ties have a higher UV resistance due to increased Carbon black loading. G series ties offer rapid installation due to the low friction coefficient of the material and have an angled tongue to facilitate easy introduction into the buckle. Rounded corners for increased safety.

Material: PA6.6 Polyamide, self extinguishing to class V2: UL 94

Humidity absorption: 2.5% (at 50% relative humidity)

Resistant to Oils, Bases, Greases, Oil products, chlorinated Solvents.

Operating temperature range:

-40°C (-40°F) to +85°C (+185°F) (continuous)

-40°C (-40°F) to +120°C (+248°F) (short periods)

PA6.6 -40°C +85°C

ACCESSORIES

Stainless Steel INOX AISI 304 cable ties

Unique ball locking mechanism that allows simple and rapid installation and secure locking.

High tensile strength.

Nonflammability.

Material: Stainless Steel AISI 304

High resistance to Acetic Acid, Alkalies, Sulphuric Acid, Corrosion, etc. In general very resistant to most hostile environments.

Operating temperature range: -80°C (-112°F) to +500°C (+932°F)

Installation tool

for Stainless Steel cable ties

Type 5527030079

Width up to 7,9 mm

With cutting device

Weight: 0,56 kg

Length: 180 mm

Check max tie width (dimension H) for the tag or holder used

Aluminium plates GMC-AL page 61
Stainless Steel tie-on tags SMP page 70

Push button legend bases

for Ø 22,5mm manual operators

Ø 22.5mm push button legend bases to fit a wide range of popular brands. Type PTPO without locators may offer a higher level of ingress protection depending upon installation method.

All types have a hole behind the legend for rivet fixing, while PTP...A types are adhesive backed.

All types suit MG-TAP 15x27 mm legends and can be fitted with a transparent legend cover TAP-CCS 990521 or MG-TAP-CCS 990510

Material: Polycarbonate, self extinguishing to class V0: UL 94

Operating temperature range:

-40°C (-40°F) to +115°C (+239°F) (continuous)

-40°C (-40°F) to +130°C (+266°F) (short periods)

Circular symbol with red border and bar, black pictogram on white background. Used to prohibit specific acts that could be dangerous.

MS

Labels

Mandatory signs

PVC film, on sheet, relevant standard ISO 3864-2

Consist of MS symbols supplemented by information in text form, or text only signs which can be used in combination with symbol only signs.

Available in different graphic modes and formats, for marking equipment, machinery and installations in a detailed and efficient way.

Material: Soft PVC film VY278, thickness approximately 0,1 mm. Resistant to Water, Oil, Grease, Alcohol, Detergent, Alkaline Substances and Atmospheric Agents. Low flammability, self extinguishing. Recommended for application to equipment for internal or external use, but not directly exposed to atmospheric agents. If exposed to atmospheric agents, the life of the label may be limited to five years.

Application temperature range: -30°C (-22°F) to +80°C (+158°F)

LLS-ILS

Chemical and pharmaceutical applications commonly require the use of very thin and strong labels capable of withstanding contact with chemical agents.

Grey and 'silver' Polyester labels are widely used in the electrical and electronic industries. 'Silver', ie. metallised, labels contain a layer of conductive Aluminium which becomes electrically charged during printing.

Grey labels are non-conductive and may be preferred when it is necessary to avoid the risk of electrical discharges in the printer.

Both types have a similar top surface.

Polyester is recommended for its transparency and non-deformability. Improved visibility may be obtained with coloured Polyester labels available in a wide range of materials supplied by Cembre.

Labels

Labels for laser and inkjet printers

self adhesive

Blank labels for laser or ink-jet printers.

Supplied on A4 sheets, in UL certified materials such as polyester and polyolefin, for long-term use, at very high temperatures if necessary.

LLS and ILS labels can be used to identify electrical and electronic components with the high quality print provided by desktop printers.

Supplied in packs of 10 and combined with a strong liner, each sheet of labels must be fed manually into the printer.

Material: Polyester outdoor WPYM, white, matt

Application temperature range: -40°C (-40°F) to +140°C (+302°F)

Operating temperature range: +10°C (+50°F)

Thickness: 50 µ

Self adhesive: permanent

Material: Polyester outdoor GPYM, metallic grey, matt

Application temperature range: -40°C (-40°F) to +140°C (+302°F)

Operating temperature range: +10°C (+50°F)

Thickness: 50 µ

Self adhesive: permanent

Material: Polyester indoor YPYM, yellow, matt

Application temperature range: -40°C (-40°F) to +140°C (+302°F)

Operating temperature range: +10°C (+50°F)

Thickness: 50 µ

Self adhesive: permanent

Wraparound cable markers

for laser printers, self adhesive, A4 sheet

KML wraparound cable markers are suitable for identifying large diameter cables, tubes and conduit.

Material: transparent polyester film. Long-life Acrylic adhesive.

Resistant to Water, Oil, Grease, Alcohol, Detergent, Alkaline Substances, Sea Water and all kinds of Detergents.

Excellent dimensional stability, optimum antiageing qualities

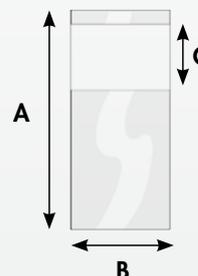

Application temperature range: -40°C (-40°F) to +125°C (+257°F)

Terminal block marker cross reference chart

MG-CPM terminal block markers are available in versions to suit the particular clip formats of the most widely used products, see cross reference chart to side.

Depending on type, markers are presented as joined strips at a set or flexible pitch or as separate markers for convenient individual insertion on mixed pitch terminal block assemblies. See markers on page 18

MARKERS APPLICATION

MODULAR STRIP Marker width is less than Clip width, while Marker width and Clip pitch are equal.

MODULAR FLEXIBLE STRIP Marker width is less than Clip width, while Marker width and Clip pitch are equal.

SINGLE CLIPS TO PITCH Marker width is equal to Clip width and also Marker width and Clip pitch are equal.

SINGLE CLIPS COMPATIBLE TO PITCH Marker width is less than Clip width, while Marker width and Clip pitch are equal.

SINGLE CLIPS Marker width is equal to Clip width, while Marker pitch is different to Clip pitch.

SINGLE CLIPS COMPATIBLE Marker width is less than Clip width, while Marker pitch is different to Clip pitch.

QUALITY

INDELIBILITY

CEI EN 60950-1

Information technology equipment - Safety

Part 1: General requirements

§ 1.7.11 Durability

Compliance is checked by inspection and by rubbing the marking by hand for 15 s with a piece of cloth soaked with water and again for 15 s with a piece of cloth soaked with Hexane.

After this test, the marking shall be legible; it shall not be possible to remove marking plates easily and they shall show no curling.

CEI EN 61010-1 Ed.2 equivalent to VDE 0411-1

Safety indications for electric devices

for measurement, control and laboratory use

Part 1: General indications

This regulation requires that both material and the print shall withstand cleaning with chemical agents commonly used in industry.

By rubbing manually by hand, without excessive pressure, for 30 seconds with a cloth soaked in the specific detergent or, if not specified, Isopropyl Alcohol.

CEMBRE INTERNAL TEST

This test was created to simulate cleaning with chemical products commonly used on various surfaces.

By wiping with a cloth soaked in 95% Ethanol 30 times and making a visual inspection after every 10 passes.

SALINE MIST

EN ISO 9227

Environmental Testing

Part 2: Tests - Test Ka: Salt mist

The test methods listed by the standard are the following:

- Concentration of 50 ± 5 g/l of Sodium Chloride;
- pH of the solution between 6.5 and 7.2;
- Temperature inside the cabin $35 \pm 2^\circ\text{C}$.

Self-adhesive media are applied to plastic surfaces, while cable markers are applied to cables with PVC insulation.

After the test, the samples must undergo a visual examination and, if necessary, electrical and mechanical controls as required by appropriate regulations. At the end of the test, the print should still be legible.

CEMBRE

Test methods

conforming to the edition of the standard current at the time of testing

RESISTANCE TO SOLVENT VAPOUR

CEI EN 60464-2

Resistance to solvent vapour is verified by the condition of the test sample following exposure.

The standard requires the sample to be placed in a container of the specified solvent.

The test samples must be suspended vertically with the lower edge around

150 mm above the surface of the test solvent. During the exposure, the liquid must not evaporate completely and, if necessary, must be topped up. The temperature of the test solvent must be $23 \pm 2^\circ\text{C}$ and the duration of exposure must be $168\text{h} \pm 1$ (seven days). After removal from the container, each test sample must be examined to determine whether there has been any change in appearance, loss of adherence of the sub layer, exfoliation, detachment, bulging or other signs of deterioration.

Solvents used by Cembre are: Acetone (not for PVC material), Ethanol, Hexane

Excepting PET transparent material.

RESISTANCE TO ABRASION

DIN 30643

This standard specifies a test method to determine resistance to rubbing and abrasion of printed flat surfaces that are exposed to mechanical forces such as rubbing and chemical stresses such as cleaning fluids.

After testing the print should be legible to the naked eye.

The following materials printed with the MG2-EPTR 991611 Premium Black Ribbon are certified DIN 30643-A-S-3:

- Rigid flat White PVC
MG-TAP, MG-TAA, MG-TAR, MG-DOG, MG-PTS, MG-PTSA, MG-ETF,
MG-TPMF, MG-TAPW, MG-PLC, MG17.5-R, MG2-17.5-R, MG17.5-A, MG2-17.5-A,
MG-VRT-R, MG2-VRT-R, MG-VRT-AH, MG2-VRT-AH, MG-SIGNS-A, MG-CPMF.
- Rigid flat White Polycarbonate
MG-TAA-HF, MG-TAP-HF, MG-PTS-HF, MG-PTSA-HF, MG-ETF-HF,
MG-TPMF-HF, MG-DOG-HF, MG-VRT-A-HF, MG2-VRT-A-HF,
MG-VRT-AH-HF, MG2-VRT-AH-HF
- White Polycarbonate
MG-CPM, MG-TDM, MG2-TDMO
- White PVC film
MG-VYT, MG2-VYT, MG-17.5-VY, MG-17.5-SB, MG-SIGNS-VY,
MG-CPMFA
- White Polyester film
MG-PYT, MG-17.5-PY, MG-SIGNS-PY
- Yellow PVC coated fabric
MG-VCT

QUALITY

UV RESISTANCE**EN ISO 4892-2**

Methods of exposure to laboratory light sources

Part 2: Xenon arc lamps

Exposure to artificial laboratory light, in Solarbox model 1500E.

The properties of the material and the legibility of the print are verified after the test.

- *Temperature of black panel: 65°C ± 3°C*
- *Exposure: continuous*
- *Radiation: 550 W/m²*
- *Xenon 1500 W lamp*
- *Borosilicate 280 mm filter (outdoor)*
- *External testing temperature: 20°C ± 5°C*

EFFECT OF AGEING**CEI 16-7**

Elements to identify terminals and cable endings

Paragraph 7.4 Thermal tests

20 samples per type and size are used, applied on cylindrical steel barrels approx. 100 mm long: 10 of the minimum diameter and 10 of the maximum diameter of the cable used with the element. The samples are then located in a climatic chamber and held for 5 hours at the maximum usage temperature expected, then left to cool to room temperature.

At the end of the test, all of the samples should show substantial dimensional stability. None of the samples, especially those in temperature regulating material, should have breaks or cracks.

Small deformations are allowed. Where applicable, it should be possible to remove and replace elements tested in holders.

Conformity is verified by visual examination.

EFFECT OF IMMERSION IN LIQUID CHEMICALS**UNI EN ISO 175**

Test methods to determine the effects of immersion in chemicals

The standard specifies methods for exposing plastic test samples to liquid chemical agents and for determining changes in characteristics caused by this exposure. It includes the immersion test for 24 hours of the entire surface of the test sample and applies to all solid plastic materials, submitted in the form of printed or extruded materials, plates, pipes, bars or sheets with a thickness greater than 0.1 mm.

The test samples are completely immersed in a test liquid for a specified time and temperature.

Their characteristics are determined before immersion, after removal from the liquid and after drying.

The test methods specified are the following:

- Changes in mass, dimensions and appearance, immediately after removal from the liquid and after drying
- Change in the physical characteristics (mechanical, thermal, optical, etc.) immediately after removal from the liquid and after drying.
- The quantity of liquid absorbed.

Chemicals used by Cembre: Hydrochloric acid, Nitric acid, Hydrofluoric acid
