

CEMBRE Hexagonal Die Sets for HT45-E

Applications

Conduit support: Widely used in the electrical industry to secure electrical conduit (metal or PVC) that houses electrical wires and cables.

Cable and Pipe Clamps: In boats and marine environments, P clips can be used to secure cables and pipes, which are essential for power, communication, and fluid systems aboard ships.

Wiring and Cable Management: P clips are used to secure wiring harnesses, cables, or hoses within vehicle

Product Information:

Hexagonal die set for use in crimping cable connectors and cable lugs in medium/ high voltage power cables and systems. These die sets are designed to create crimps that maintain excellent electrical contact, reducing the risk of loose or faulty connections.

These die sets are designed for use with Cembre's HT45-E Hydraulic Crimping Tool, which is a hydraulic crimping tool used for a wide range of wire and cable sizes.
