

Fireseal Identification Tags

Specifications:

- Overall length of 250mm (tag size: 35 x 19mm)
- Laser printing and hot foil personalisation available
- Print Options: Name, number, Logo, Barcode
- Break Strength: Low
- Usable Length: 215mm
- Material: Polypropylene
- Minimum aperture through which seal will pass: 2.6mm diameter

Product Information:

Fire Security Seal is an anti tamper tag designed to securely seal fire extinguishers and other equipment requiring regular tests or servicing. Fireseals are applied after annual safety inspection test as a tamper-evident and indicative safety measure to determine if a fire extinguisher has been used and requires further servicing.

It has a low break-strength and is designed to break by hand, where easy removal is crucial in an emergency situations. The Fire seal is also suitable as a single-use inspection seal tag for applying on-to equipment and medical bags, crash trolleys, cabinets etc - indicating whether contents have been used.

The Fire Seal is available in 10 different colours, including popular yellow, red, blue and green col-
