Leister delivers performances.

Wherever you need to apply heat, Leister provides the ideal solution. We have been the worldwide leader in the field of plastic welding and hot-air blowers for over 50 years. For several years now we have also been offering innovative and effective laser systems and micro-systems. We develop and produce all of our products in Switzerland – so you can always rely on the proverbial Leister quality. And because 98% of our production is exported, therefore, we have established a dense network of service centers throughout the world – guaranteeing excellent service anytime and anywhere.

Headquarters in Sarnen, Switzerland

LEISTER

Plastic Welding

For decades now, we have been the worldwide market leader. The proverbial performance and reliability of our products makes Leister the first choice. Our tools are used in roof sealing systems, floor coverings, plastic sheeting, in earthworks, hydraulic and tunnel engineering, in process equipment manufacturing and for vehicle repair.

NOVOLAS™

Lasersystems

Our innovative solutions for precision welding of plastics open up new production methods in automobile manufacturing, in medical and sensory technology, electronics, as well as in micro-systems technology or in soldering electronic components.

LEISTER

Process heat

Whether for activation, heating, curing, melting, shrinking, welding, sterilization, drying or warming: hot-air is increasingly deployed in industrial processes. Leister customers profit from our extensive engineering knowledge and benefit from our advice in the conceptual design of hot-air applications.

Microsystems

In tomorrow's world, the smallest of structures will play a huge role! In order for our customers to keep ahead of the field in the future, we are already developing and producing micro-mechanical sensors and micro-optical components in our cleanroom today.

LE 3000

The air heater LE 3000 is equipped with a performance range of 2.2 kW at 120 V, as well as 3.3 kW at 230 V. The air supply as well as air outlet connections are compatible with the successor LHS 20 and its accessories.

Temperature controller and separation amplifier

Leister hot air blowers as well as air heaters are integrated into the most various machines and plants. If the hot air temperature must be precisely measured, displayed and regulated in selectable steps, then the hot air device is by default equipped with a Leister KSR Digital (cascade regulator) and a thermo-element measuring sensor. The separation amplifier (interface) is necessary for the galvanic separation between an external target value voltage (leading voltage, external potentiometer) and the Leister air heaters Types 3000, 3300 and 5000.

Temperature controller

KSR DIGITAL

Technical Data	KSR DIGITAL			
Regulation type	PID			
Ready to use with preconfigured parameter set	•			
Accuracy	Accuracy better than 0.2% of scale value at 25 °C			
Switchover °C° F°	Configurable via keypad
