

# Nylon Draw Tape 20m

## Applications

- Re-routing wiring
- Cable pulling via Conduit:
- Air ducts,
- Cavities

## Features & Benefits

- Low Friction
- High strength
- Non-conductive
- Extremely Flexible
- Red Tape for easy identification
- Length: 20m

## Product information

Nylon Draw tape also called draw wire or an electrician's snake it has a low friction and high tensile strength during cable pulling applications, this is made possible by the use of a flexible head attachment that makes it simple to manoeuvre through conduits with several bends.

Its Red coloured tape is used to improve visibility to provide a simpler and quicker identification inside conduit systems that already have cables in them.

The sturdy plastic case makes storage and transportation easier in addition to helping with tape rewinding.

It has a robust plastic case for convenience during tape rewinding, storage and transportation.

The Nylon tape has non-conductive qualities that make for a safe working environment.
