

Heavy Duty Hot Knife Webbing Cutter 150mm

- 300 Watts
- Portable - Weighs only 6.3kg with power weight
- Split design, just handheld portion 43g
- Heavy duty extruded steel aluminium construction
- Cutting width 150mm

Voltage	230V/ 50Hz
Power Supply (W)	220-230V AC; UP to 300 W
Working Temperature up to	approx. 900° F (480°C)
Blade Length	150mm
Net Weight	5.3kg
Gross Weight	5.5Kg

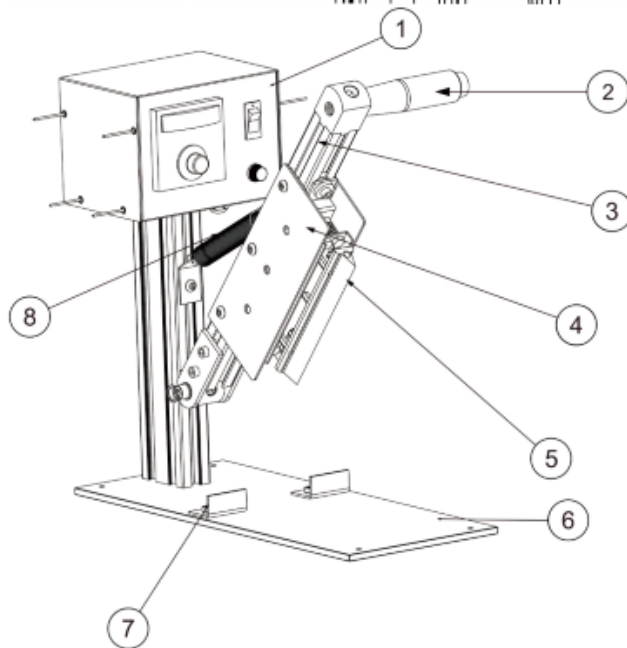

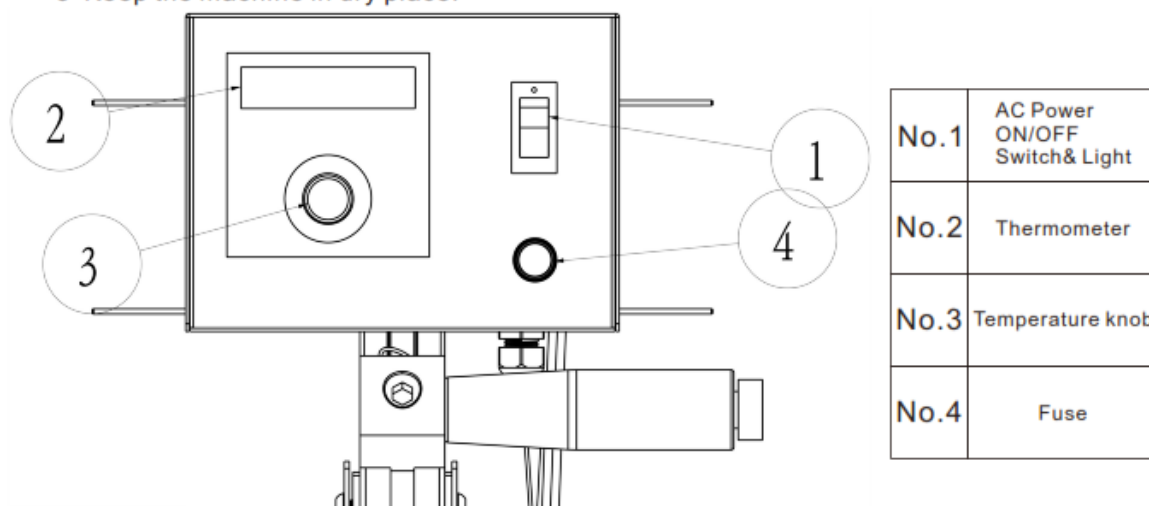

INSTRUCTIONS

Try with a small piece of wasted webbing/ribbon/rope before using it.
Please turn off the machine when it is over heated.
Keep the temperature fixed and cut the material at a stable speed.
Try to use all part of the blade to prolong its lifespan.
When the smokes comes out, there will be some wastages on the blade,
please brush it off the blades. (Do it when the blade is hot!)

MAINTENANCE

- 1- Unplug the machine.
- 2- Check the machine if there is any damages like rusts.
- 3- Check the blade if there is any wastages stuck on it. Clean them off with the brass brush.
- 4- Don't wash the machine with corrosive detergent.
- 5- Keep the machine in dry place.

To operate, simply slide the material across the base plate(No.6) and bring the handle down(No.2) to cut and seal with minimal effort. Cutting time is usually less than one second, depending upon the material thickness and heat setting. With choice of heat controller and operating voltage.
