

Leister Hand Grooving Tool for Flooring Applications 106.966

Applications

- Flooring
- Tiling
- Home DIY
- Doorways
- Finishing long seams

Product Information

The Leister handheld grooving tool (product code 106.966) has a range of applications, but mainly used in doorways or to finish the ends of long seams. Ideal for areas where a power groover can't get access to.

Creates a V shaped groove in many softer materials including PVC vinyl and linoleum flooring in preparation for welding. The Wooden handle makes it easy to use and the removable hardened steel grooving blades are easy to interchange

The Leister hand grooving tool comes with an additional 5 spare blades that conveniently store in the handle. In addition, the ergonomic design of the handle makes it easy to use and the removable hardened steel grooving blades are easy to change out.

Specifications:
