

Conduit External Hinged Elbows

Applications

- Electrical installations
- Residential settings
- Industrial facilities
- Organisation & protection of wiring systems
- Ensures the smooth functioning of electrical systems

Features & Benefits

- One-piece external design for unrestricted bore and quick assembly with no tools.
- High pull-off strength – Conduit corrugations sit tightly into joiner junctions.
- Conduit size labels – Each junction indicates nominal conduit size to aid installation
- Polyamide (Nylon) 66
- IP40 rated
- Temperature Range: -40°C to 120°C
- Very high UV resistance
- Self-extinguishing, low smoke toxicity & halogen free

Product Information

One-piece joiner and elbow hinged fittings allow a variety of conduit size variations.

These fittings are designed to snap together over all types of slit and unslit conduit, thus maintaining maximum conduit bore.

Can be used as a reducer as well as an enlarger.

Designed to protect against pressure washing, excessive cable strain, harsh and aggressive environments and mechanical abrasion. These hinged fittings allow for protection of critical cables and wiring at breakouts, providing automotive wiring harness serviceability and for the conduit system to self-level.

part no	Conduit size (nc)		Conduit sizes (nw)		nominal dimensions
