

Butane Cartridge 8191 for 8800 Blow Torch Lamp

8191 gas cartridge is recommended for our 8800 Gas Blow Torch. As efficient as a conventional butane gas cartridge, this torch gas cylinder is obviously much easier to carry and use.

Concentrated security and quality!

The universal, safety gas cartridge is fitted with the 'Stop Gas System'. This system ensures your safety in all frequent cases of improper handling of the equipment. Never intentionally unscrew an opened cartridge, do not store an opened cartridge, do not let children use a heating appliance.

Containing 190 g of butane, it is suitable for any applications that requires butane such as soldering iron, soldering torch or the like, that utilizes a type 200 butane gas cartridge. This system restricts gas leaks, as it can be disconnected from different devices that uses butane gas to operate. The compact framework of this cartridge makes it easy to carry and utilize. In
