

Cordless Hand Held Hot Wire Styrobow Foam Cutter 230V

The Manual Hand Cutting Strap

This lightweight manual Bow Foam Cutter can be used for cutting Styrofoam and other similar synthetic insulating materials. It can also be used in the building and packaging industries. This cutter is diverse, robust and maintenance free. With the manual strap, polystyrene non-plasticised foam slabs can be cut to length and to form mitres.

This Cordless Styrobow Foam Cutter is supplied with two high-performance ion batteries, independent of the mains, so that it can be utilised freely without the restraint of any cables and freehand cuts can be produced. Also supplied with transformer for the option to be powered via the mains.

Max Cutting Length = 53 inch (1350mm)
Max Cutting Depth = 12 inches (310mm)
Weight = 1.9Kg

Interface Options:

Straight, miter, bevel, seaming, shiplap, separation, wedge cuts etc.

Technical Information:

- 42V 200W Transformer / 110V Operation
- Cutting length: 1,350mm
- Cutting depth: 310mm
- Weight: 1.9Kg
- Supplied with two high-performance ion batteries (35V-1.5AH) in carry case
- Power transformer with thermal fuse
- Safety transformer to VDE and EN protection IP 54
